

+LUCKY

SMART WEARABLE THERMOMETER

Safe fever monitoring

Continuous monitoring

In the form of a soft, comfortable and supple **patch**, Tucky is placed under the armpit and allows to monitor **evolution of body temperature**.

Real time temperature curve is displayed on a remote smartphone app.

An **alert** is raised when fever exceeds a threshold temperature (audible and visual notification).

Without distance limit

Fever can be monitored either at home (5-10m via Bluetooth) or remotely via internet on a 2nd smartphone (secured cloud data synchronization).

A simple and intuitive app

Multi profiles, multi devices, curve / timeline views , data history,, health book...

A secured medical device

Class IIA Medical Device

CE marking / ISO13485 Certified

Patented Technology

Ultra low wave emission

Secured data

Certified Healthcare Cloud

The most complete thermometer of the market

Thermometer	TUCKY	Ear / temporal	Traditional
			
24h continuous monitoring	✓	x	x
